

World Suicide Prevention Day 2020

September 10th, 2020 will be held the 18th edition of the World Suicide Prevention Day which will have for theme "Together to prevent suicide". World Suicide Prevention Day is observed each year to promote worldwide action to prevent suicides.

This day reminds us that suicide is a collective issue, which requires the commitment of each of us. Each of our suicide prevention actions has a major impact on people in distress, their loved ones and our communities. The more many of us feel concerned and take action, the more effective our actions are in reducing the number of deaths by suicide
