NOTICE TO THE COMMUNITY

COVID-19 – Recommandations upon arrival on the Islands

Local Public Health recommends that everyone be very aware of the various symptoms associated with COVID-19, especially for those arriving from outside the Islands.

Public Health also recommends that travellers arriving on the Islands avoid non-essential travel in public places and that they avoid receiving or visiting people other than those living at the same address for a period of 14 days.

In addition, travellers arriving from outside the country are required to stay in isolation for a period of 14 days.

Thank you for your cooperation.
